

Installing the Coop Wheels

NOTE: the wheels that swivel should be mounted on the same side of the coop as the handle attachment.

Elevate the front of the coop (about 12-14") using a car jack or a solid, stable object.

Position the wheel on the cross beam as shown.

Attach each wheel to the cross beam using four 2 1/2" screws (included).

- Screw holes are predrilled on the wheel bracket.
- Use 2 screws on each side of the wheel bracket.
